PROJECT(S)

College-X(CX)

React js, Node js, Mongoddb , Express, Socket.io

Developed a college-level social media platform for students to share experiences and interact.

Built using the MERN stack with scalable backend APIs and responsive UI. ntegrated Socket.IO for real-time updates and Brevo SMTP for automated email notifications.

Welding shop website

React.js, Django REST Framework | Personal Project

Developed a responsive full-stack platform using React, Django, and Django REST Framework to showcase welding services and past projects. Integrated Cloudinary for efficient image storage and retrieval, implemented a contact form for inquiries, and optimized the site for performance and mobile compatibility.

Framestack Website

React.js, Django REST Framework | Personal Project

Built a full-stack website development platform where clients can register, purchase plans, order custom websites, and track progress through a personalized dashboard. Integrated Brevo SMTP for email notifications, implemented an admin panel to manage users and orders, and optimized both frontend and backend for smooth deployment on Render.
